

Elevating space and taste

Introducing high-end design through customized space optimization

TORONTO WINE DISTRIBUTOR OFFICE

To support their growing business, this high-end wine distributor relocated to a 5,500 sf brick and beam space in trendy Liberty Village as a means to realize their vision of a specialized and exclusive space. This new space brought an opportunity to deliver a stronger brand and client interface. The mandate was to create a sophisticated, timeless space that articulated a high design ethic. Drawing inspiration from Architect Carlo Scarpa – a master of detail and craftsmanship – the client’s vision was reflected in their exacting standards and manifested in their choices of finishes, fixtures, and materials. The end design pushes the boundaries of what is considered typical commercial interior design, providing the client with their desired hospitality-level luxury specification.
