

Elevated design for a memorable experience

Inspired by traditional rooms found in ancient Roman villas

GRAND VILLA CASINO

The Grand Villa Casino is a newly constructed, five-star gaming facility operated by Gateway Casino and Entertainment Ltd (Gateway). A design concept was inspired by traditional rooms found in ancient Roman villas – upper-class, country houses built for the elite. The casino showcases a modern interpretation of these rooms as they apply to the layout of the gaming floor and restaurants, creating a dynamic and escapist atmosphere for guests. For this new facility inside the Rogers Arena in Edmonton, Gateway wanted to rebrand the Grand Villa concept. Their objective was to create a memorable experience that showcased gaming along with various food and beverage offerings. Rebranding the Grand Villa Casino has created a flagship location for the client, and the elevated design has set a new benchmark for their other gaming facilities across Canada. The casino attracts a wide variety of clientele while remaining a popular downtown destination that Edmonton can proudly boast.
